

The **DTI 5000** Automatic-Feed Screwdriver System For Your Doorlite Application

- Eliminates the repetitive motion of hand-loading each screw to the end of a tool, resulting in improvements in ergonomics and safety.
- The patented auto-feed design of the DTI 5000 is the most simplistic and reliable in the industry.
- Can be custom designed and manufactured for your specific screw and doorlite application.
- Special barrel design helps operator easily locate holes in your doorlite application.
- Increases worker productivity a minimum of 30% in a few short weeks.

- Properly seats each screw to your desired torque range.
- Please contact us to schedule an on-site demonstration by a knowledgeable trained professional.
